

VIRTUAL FORUM SERIES

# CONNECTED & EQUITABLE MOBILITY

**WEDNESDAY MAR 16**

<https://publicinput.com/D4281>

# Forum Objectives

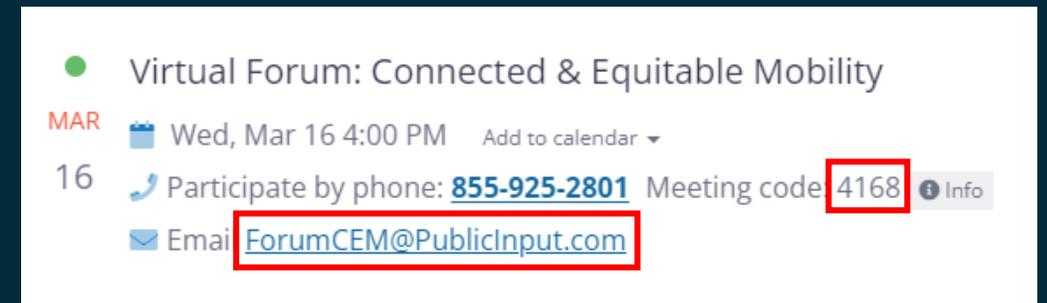

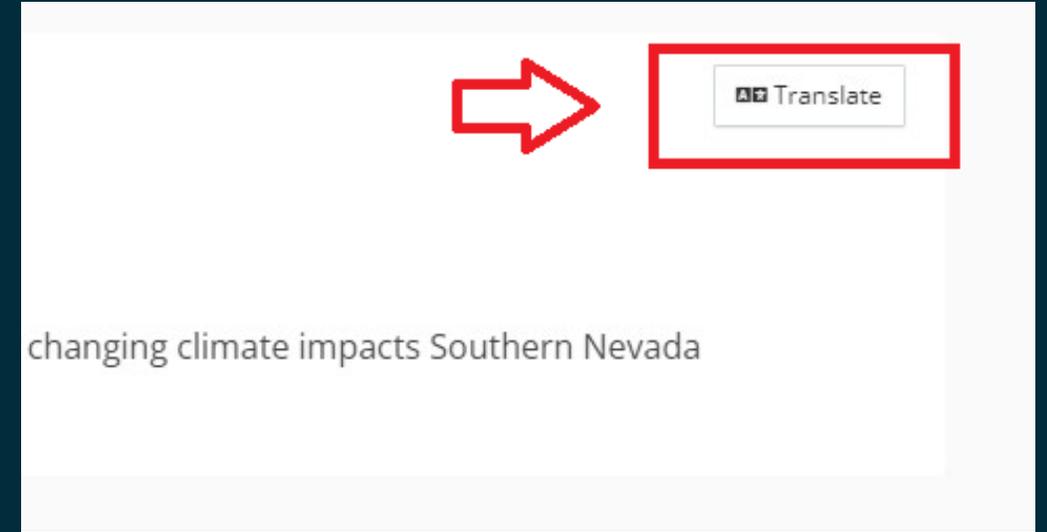

- **Review** how climate change affects transportation systems and mobility in Clark County.
- **Describe** how our choices in how we get around can contribute to sustainability and resilience.
- **Discuss** ideas and considerations to achieve solutions in this focus area.

# How to Use Public Input

- **Call in** to hear audio and leave voicemail comments.
- **Type** comments into the chat.
- **Translate** the page and meeting audio.

# All-In Clark County

Address climate change and create a more sustainable future.

A smart, bold, inclusive approach to ensuring the well-being and prosperity of all, today and for future generations.

Led by **Department of Environment and Sustainability**

*Samantha Baker*

*Sustainability Program Administrator*

# Quick Poll

# CLIMATE CHANGE AND MOBILITY

**CHANGING  
CLIMATE  
CONDITIONS:**

**WHICH LEAD  
TO CLIMATE  
HAZARDS:**

**RESULT IN THE  
FOLLOWING DIRECT  
AND INDIRECT IMPACTS:**

**Temperature**

**Heat Waves**

**Precipitation**

**Intense Storms  
Flooding  
Drought**

- Heat related illness
- Poor air quality
- Higher energy demands
- Pavement buckling

- Wildfires
- Smoke

- Infrastructure damage
- Blocked roadways
- Power outages
- Water shortages
- Crop/habitat damage

# What Climate Impacts Mean for Mobility

- Health and safety concerns for users of *all* modes due to extreme heat
- Physical damage to roads, infrastructure, and technology
- Air quality challenges exacerbated by traffic
- Economic impacts when deliveries, tourism, or commutes are interrupted

Calico Basin July 2021

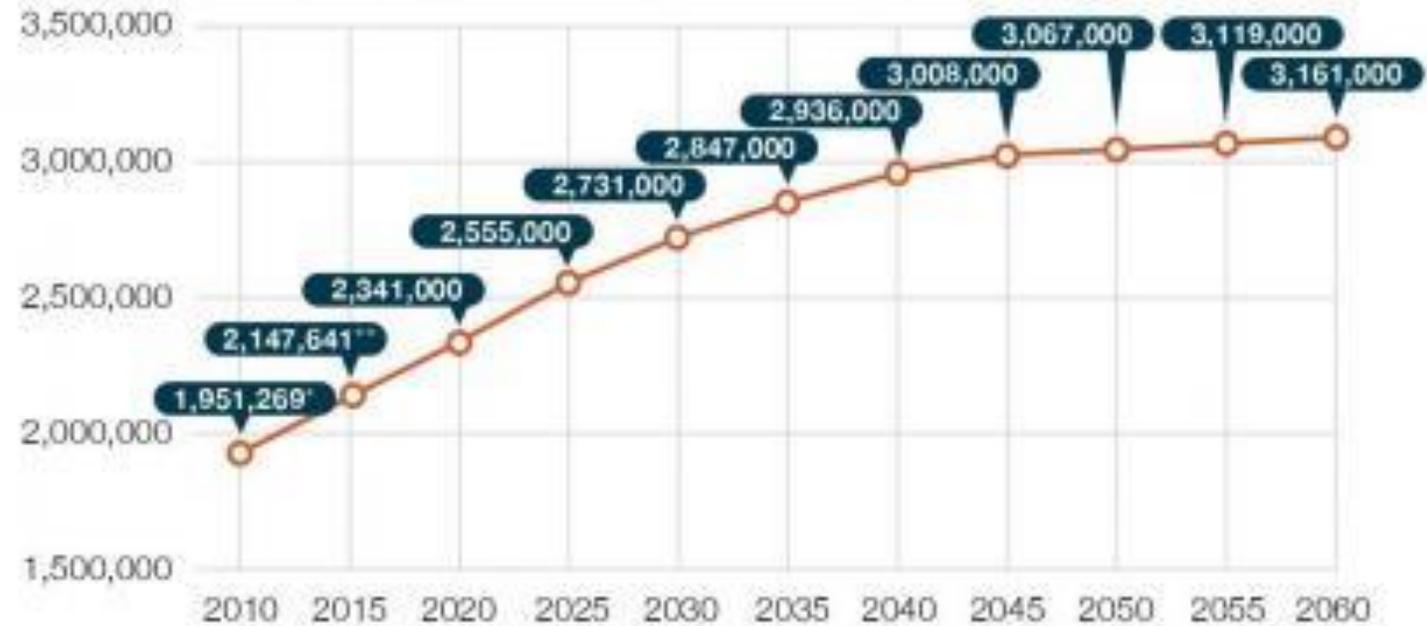

# Increasing population

**860,000**

New residents  
expected by

**2060**

Clark County Population Forecast (2010-2050)

\*2010 U.S. Census.

\*\*SNRPC consensus population estimate.

SOURCE: UNLV Center for Business and Economic Research (CBER), June 2010.

# Current Transportation System

- **7,000** miles of roads
- **65 million** transit trips with RTC
- **1,000** miles of bike facilities – only **2%** of commutes include biking and walking
- **39 million** tons of goods moved by freight modes
- Vehicle miles traveled (VMT) per capita: **7,283**
  - Less than the national average

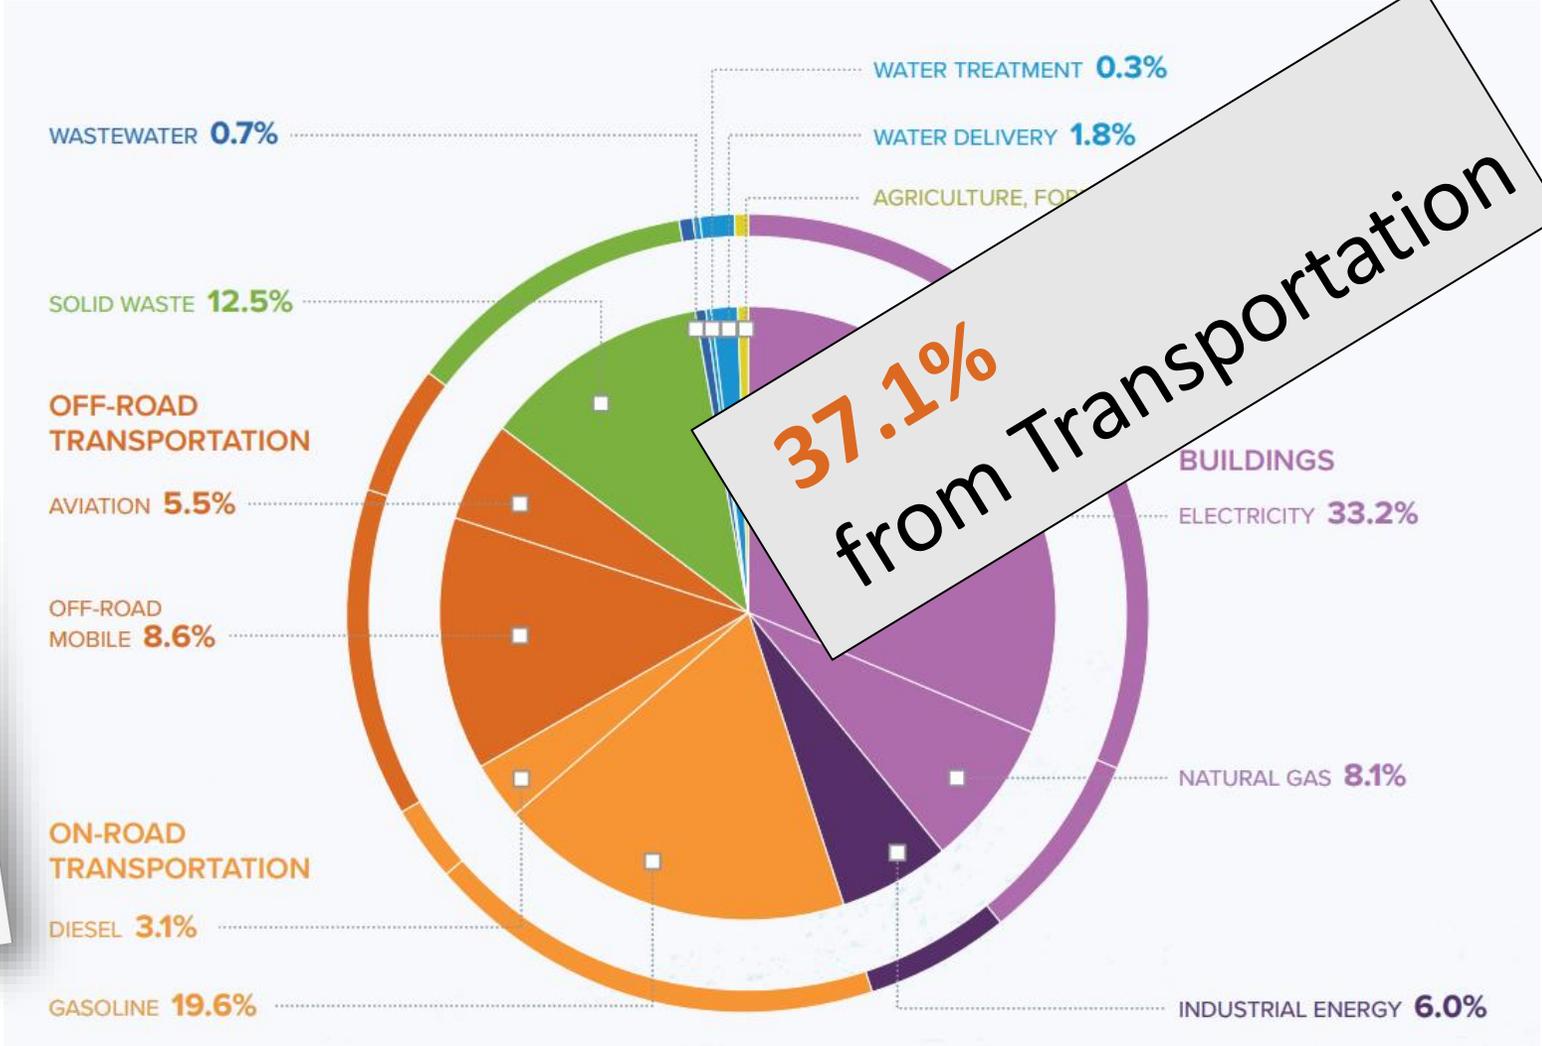

RTC Access 2050 Executive Summary

Regional GHG Inventory 2019

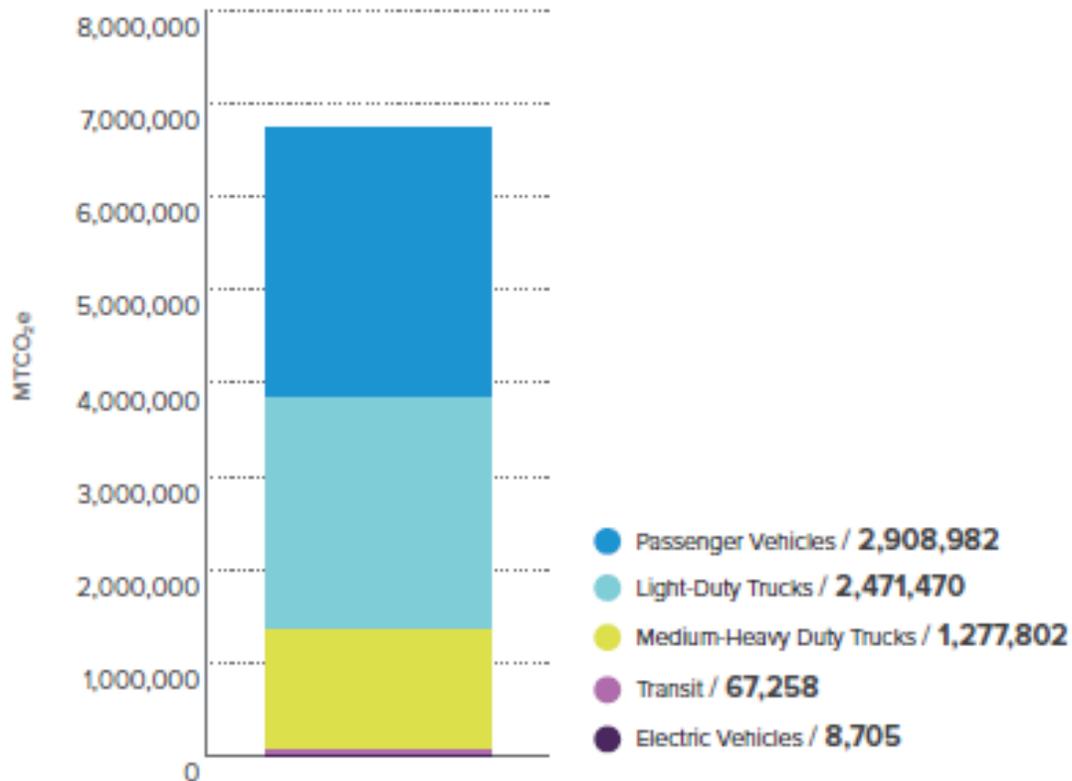

# Greenhouse Gas Emissions Inventory - 2019

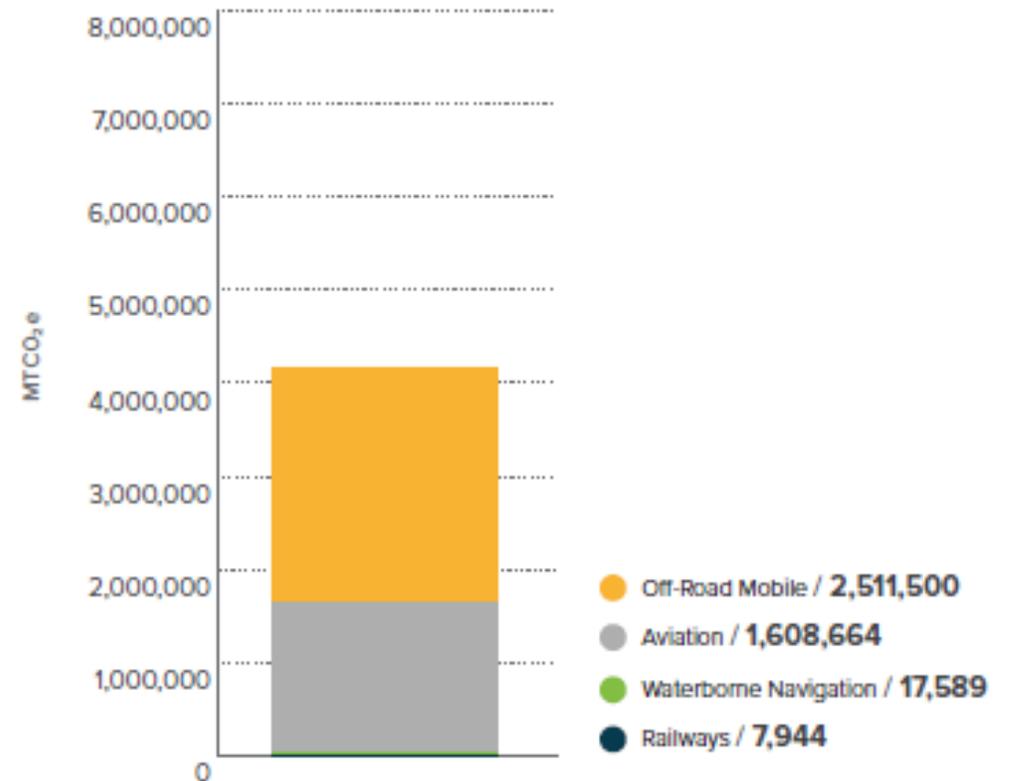

# Transportation Emissions

### On-Road Transportation

### Off-Road Transportation

# Driving Habits

“ Single Occupancy Vehicle ”

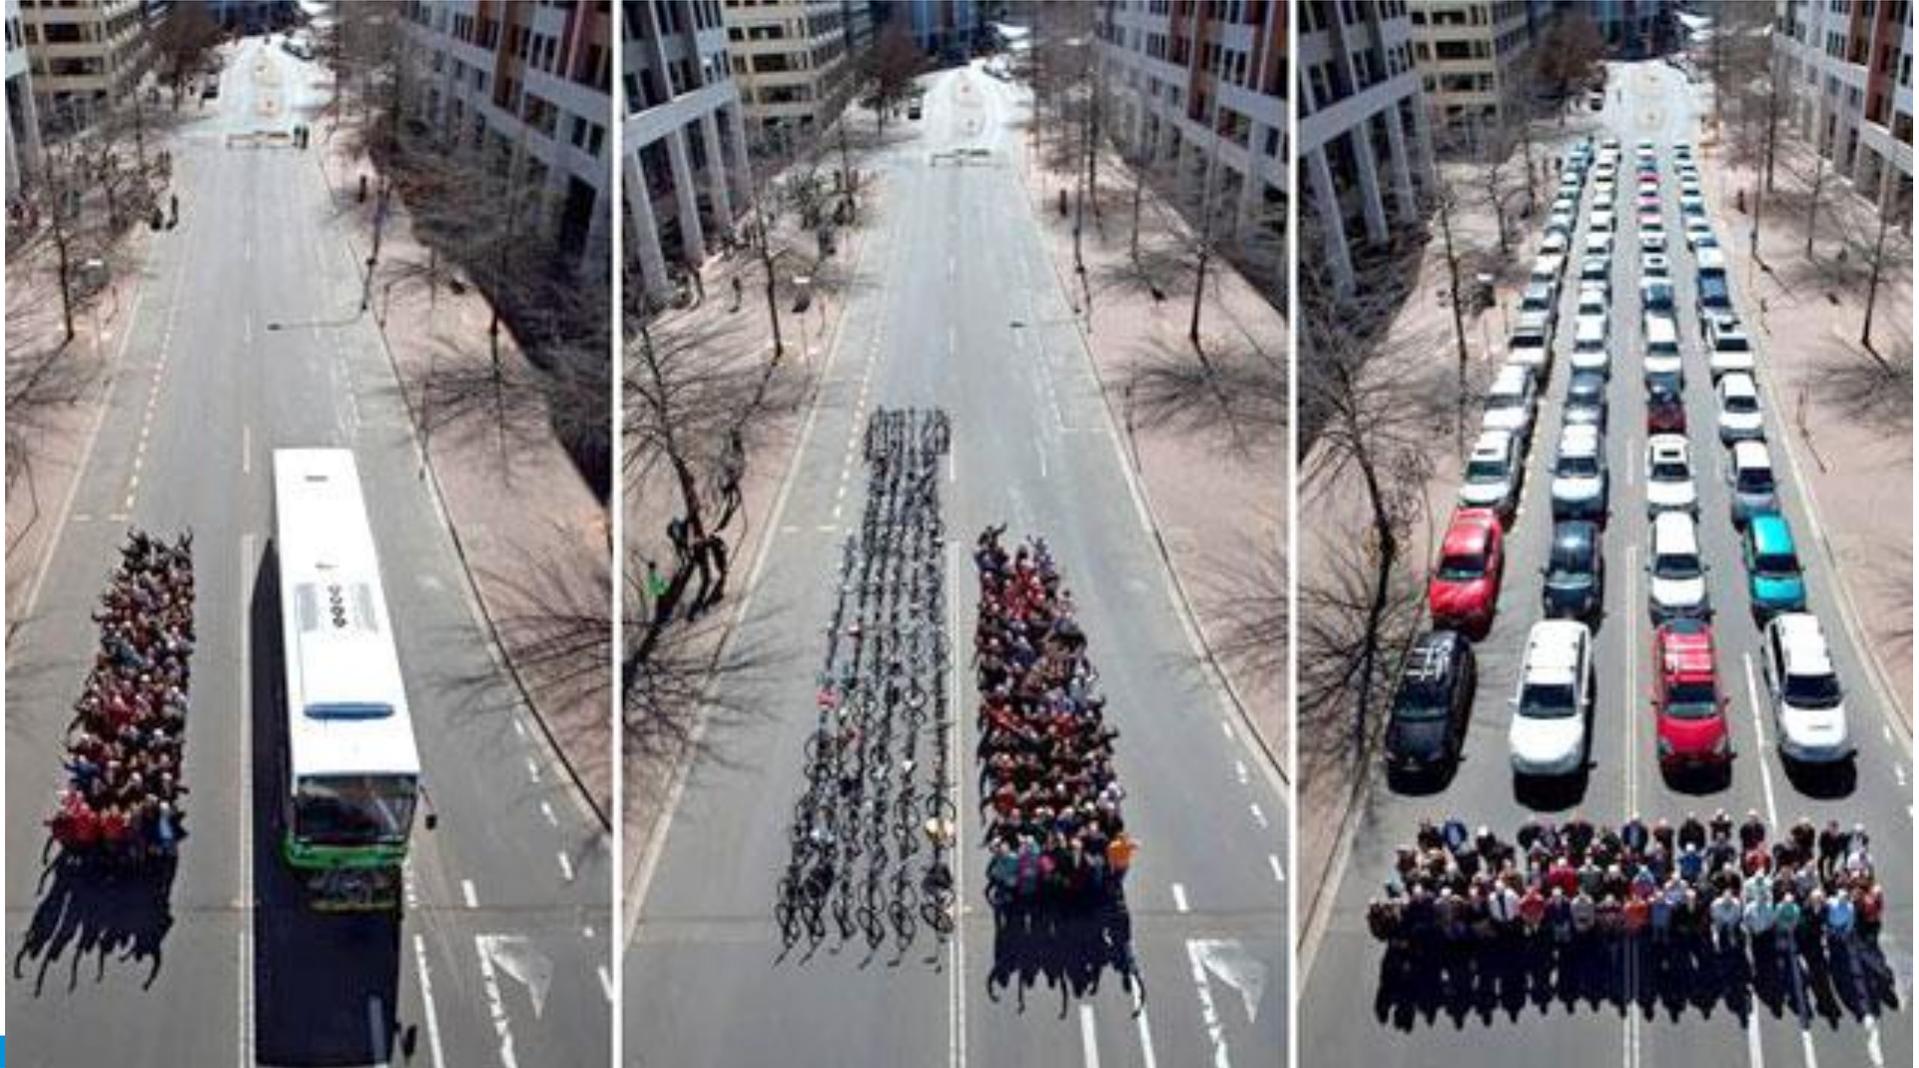

**78.2%**

of residents commute in personal vehicles, creating **50%** of transportation-related GHGs

# Cars and Land Use

70  
people

# Cars and Land Use

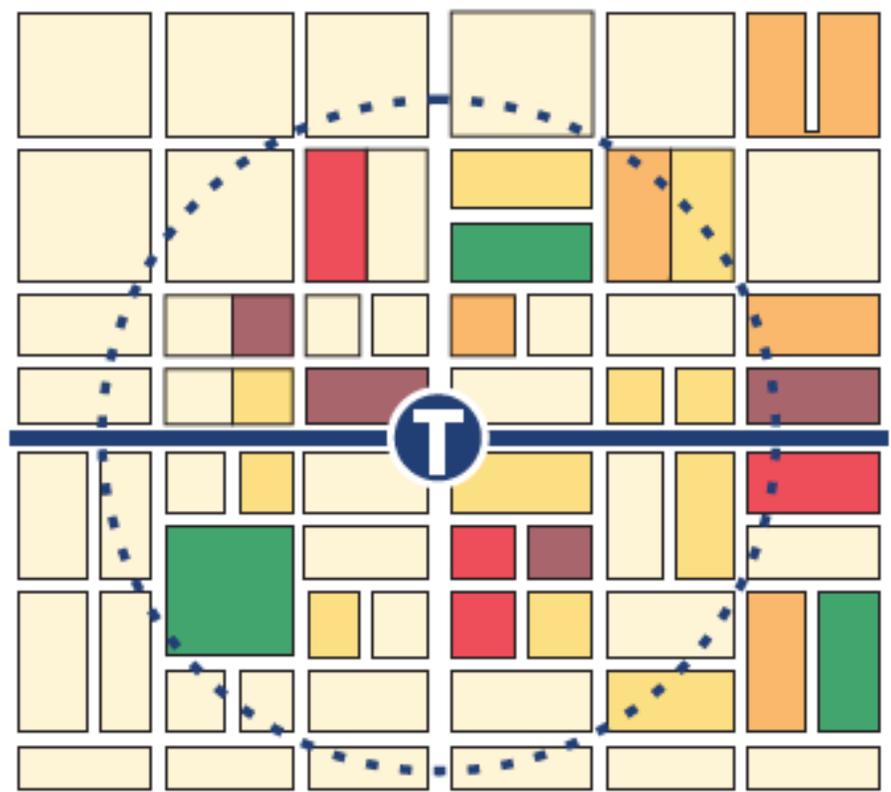

## *Transit-oriented development*

TOD creates dense, walkable, and mixed-use spaces near transit that support vibrant, sustainable, and equitable communities.

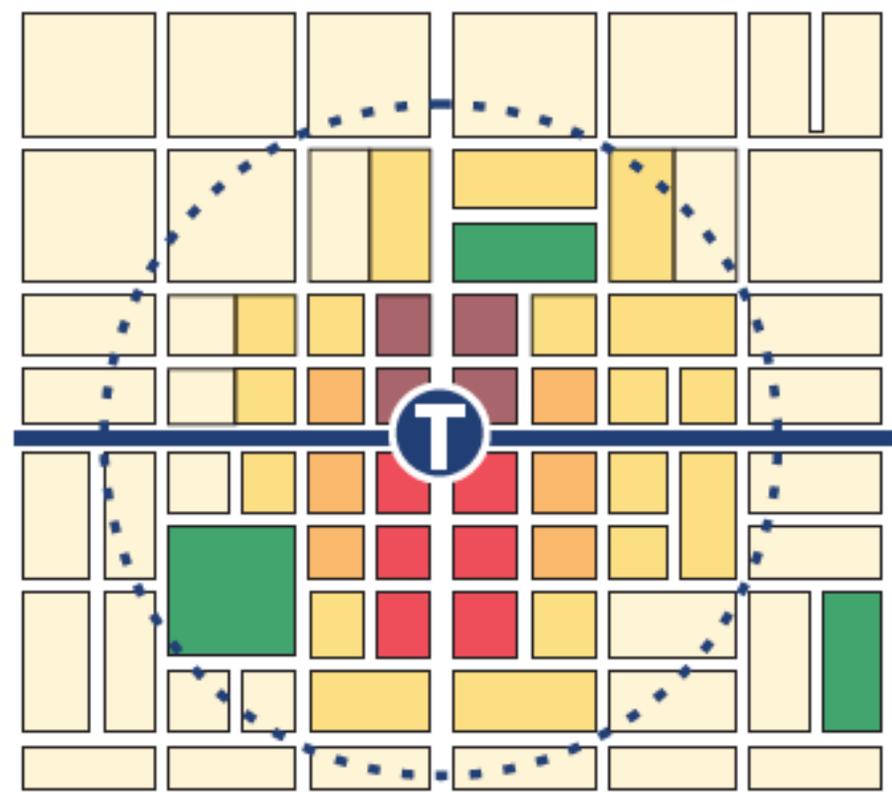

## Non-Transit Oriented Development

Land uses not organized around transit

## Transit Oriented Development

Land uses organized around transit

- Low Density Residential
- Medium Density Residential
- High Density Residential
- Commercial
- Mixed Use
- Park
- T Transit Stop
- Transit Route
- 10 minute walk

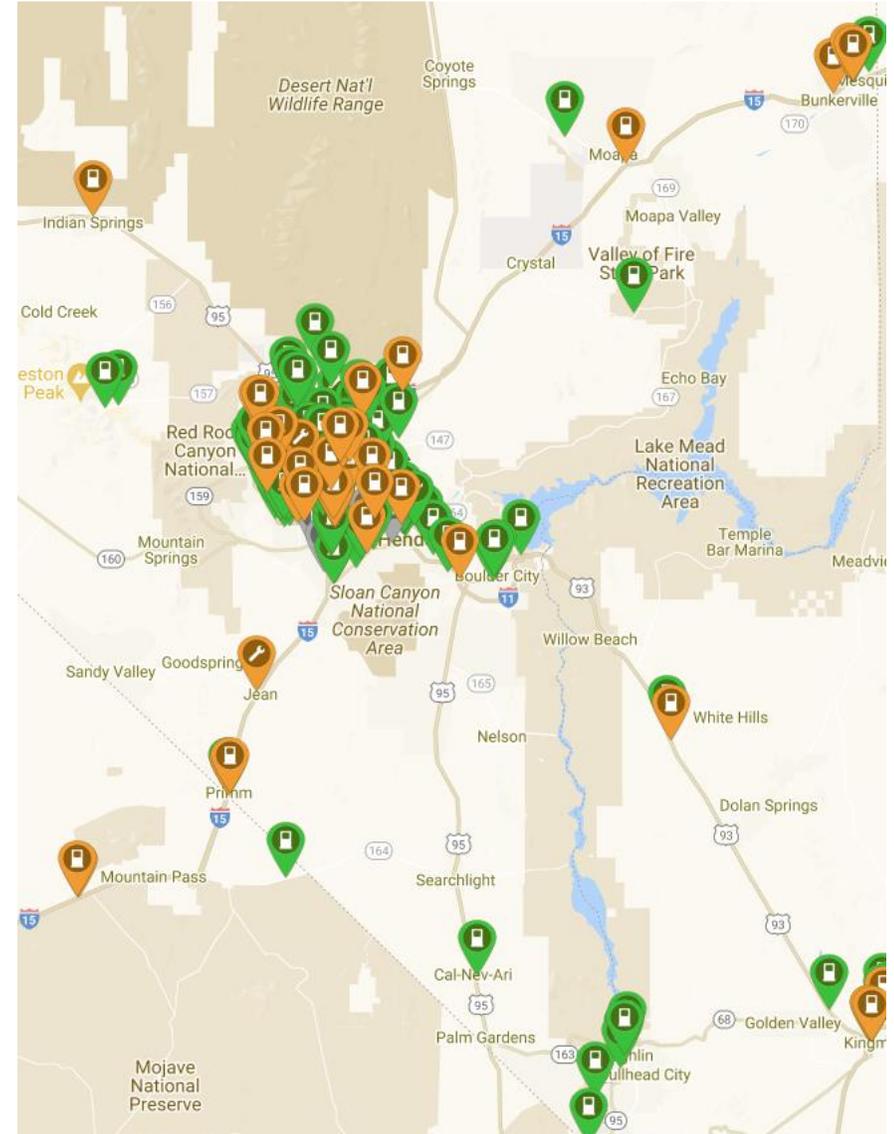

# Public Transit

- RTC On Board Mobility Plan (2021)
  - [High-capacity transit](#) (like light rail, streetcar, or bus rapid transit)
  - Expand service and connect to major destinations – resort corridor employees, jobs, housing, seniors, people with disabilities
  - Make short trips easier
- *Concerns: Personal safety, convenience, travel time, connected to destinations*
- **Future-Focused** : Electrify transit, stations as resilience hubs

# Electric Vehicles

- Cleaner even when powered by fossil fuel-based electricity
- Good time to buy
  - More model options
  - More battery range
  - Incentives for both cars and chargers
- Charging station availability

# Electric Vehicles

- *Concerns: affordability, range anxiety, access to charging, environmental impact of batteries*
- **Future-Focused:** EV batteries for energy resilience
- Clark County [EV Resource Center](#)

# Biking and Walking

- Provide low-cost mobility w/o a car
- *RTC [Regional Walkability Plan](#)* – for a street network that is safe, comfortable, and connected
- *Concerns: traffic safety, heat, transporting things and people, travel time*
- **Future-Focused:** Separated biking and walking facilities, e-bikes, universal design

# Leading By Example: Clark County

Clark County has the largest alternative fuel vehicle fleet in the state. **Over half** of county vehicles are **hybrids, EVs, or biodiesel.**

# Leading by Example: Regional Coordination

## Regional Transportation Commission of Southern Nevada

- Public transit, traffic management, roadway design and construction, regional planning
- Steward of federal and state funds and county tax revenue
- Guided by city and county elected officials, technical experts and public input
- *RTC Access 2050*
  - Improve safety and traffic congestion
  - More mobility options and connections
- *Southern Nevada Strong*
  - Increase transportation choices for residents and visitors.

# Leading By Example: More Successes

- Las Vegas ranked #1 metro area for EV growth in the nation.
- RTC's commuter services reduce traffic by ~ 3,500 cars/day.
- Clark County employees work a 4-day week. Five million fewer miles driven avoids the equivalent emissions from burning 2.3 million pounds of coal.

**6,000**

annual EV registrations in 2019 in Clark County, a **68%** increase in a single year

**WHAT IS *ALL-IN*?**

### Regional Greenhouse Gas Emissions Inventory

To assess regional sources of greenhouse gas (GHG) emissions contributing to climate change.

### Climate Vulnerability Assessment

To confirm climate hazards and the areas and systems most vulnerable to these hazards and identify solutions to enhance our community's overall resilience.

### Community Sustainability & Climate Action Plan

To grow climate literacy in the community and work together to develop a plan of action to ensure a sustainable and resilient future for all.

# Definitions

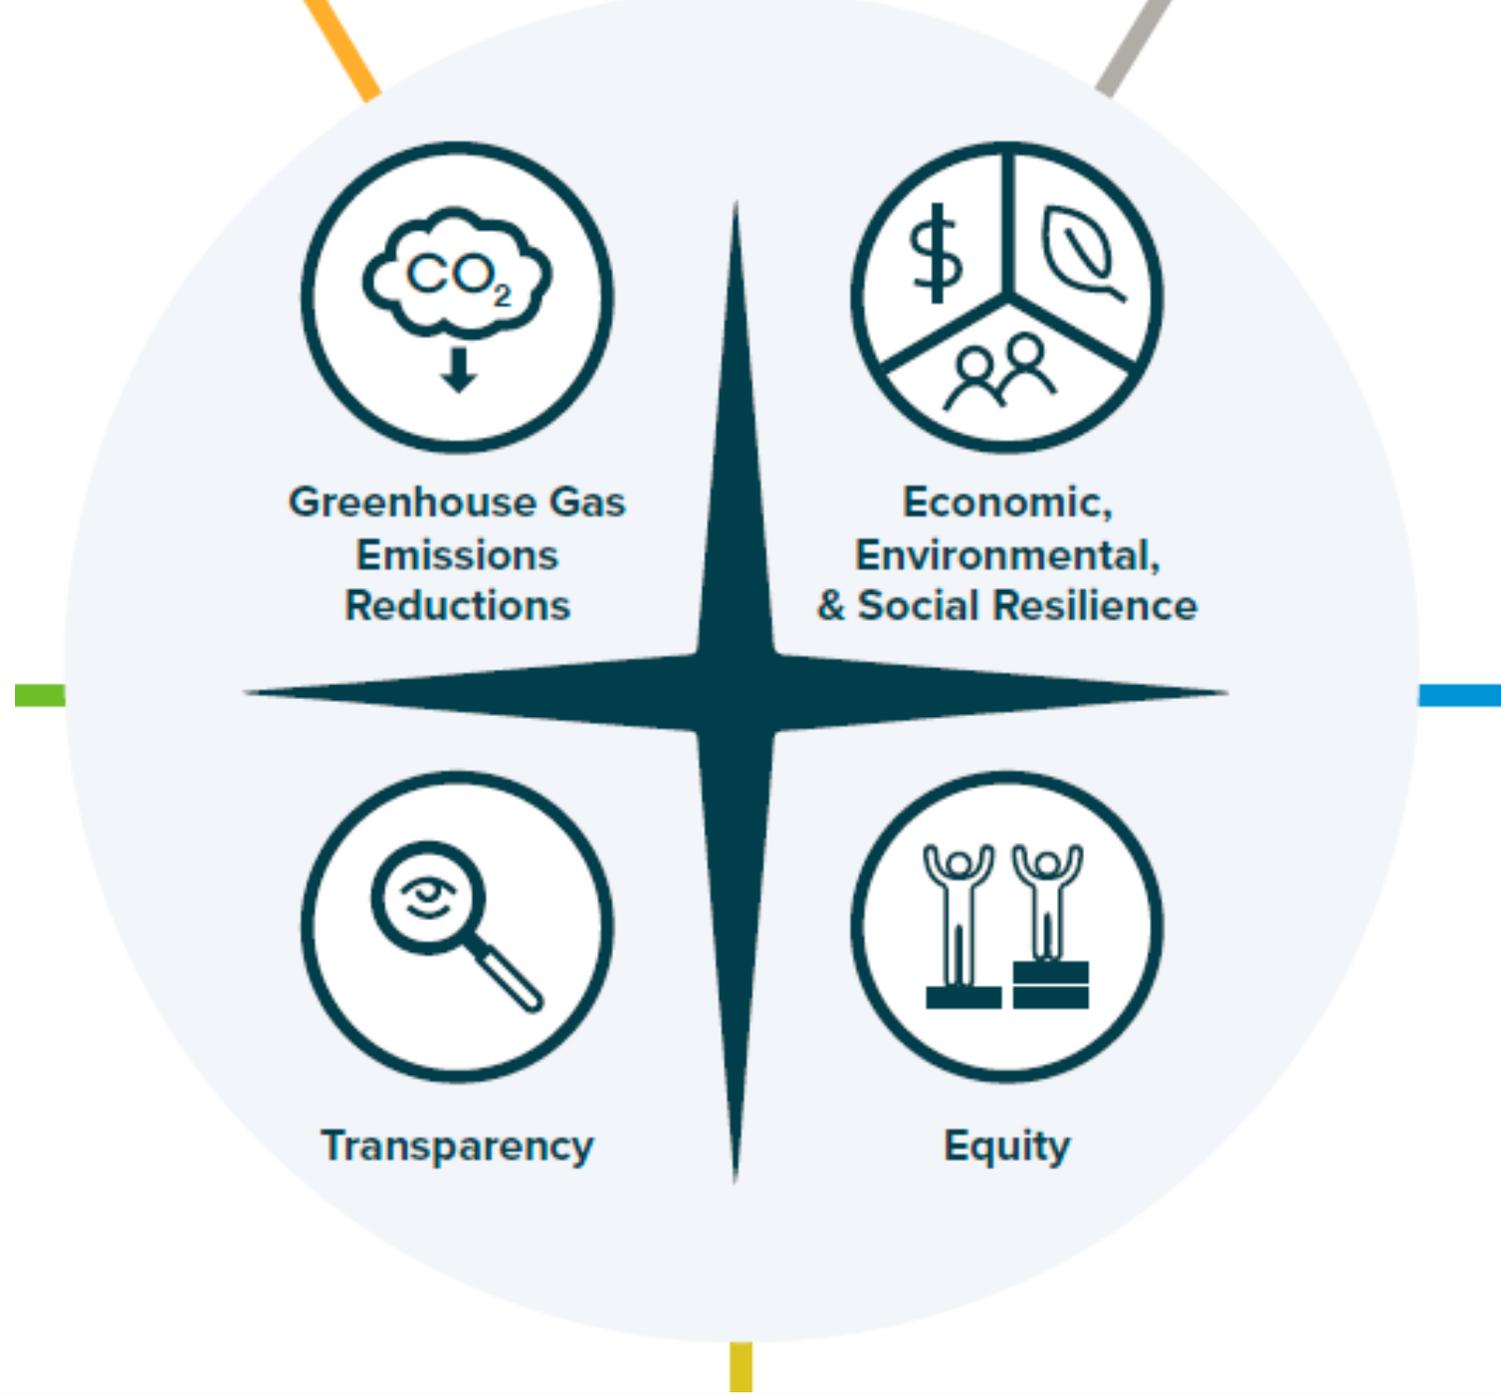

A ***sustainable*** Clark County balances resource efficiency, social well-being, and environmental stewardship while equitably meeting the needs of a growing community and thriving economy.

A ***resilient*** Clark County supports residents, businesses, and visitors to be healthy, successful, and adaptable to changing climate conditions.

# Guiding Principles

Foundation for evaluating goals and actions across the *All-In Initiative*

# Six Key Areas

**Clean & Reliable  
Energy**

**Connected &  
Equitable Mobility**

**Diverse &  
Circular Economy**

**Sustainable  
Water Systems**

**Resilient & Healthy  
Community**

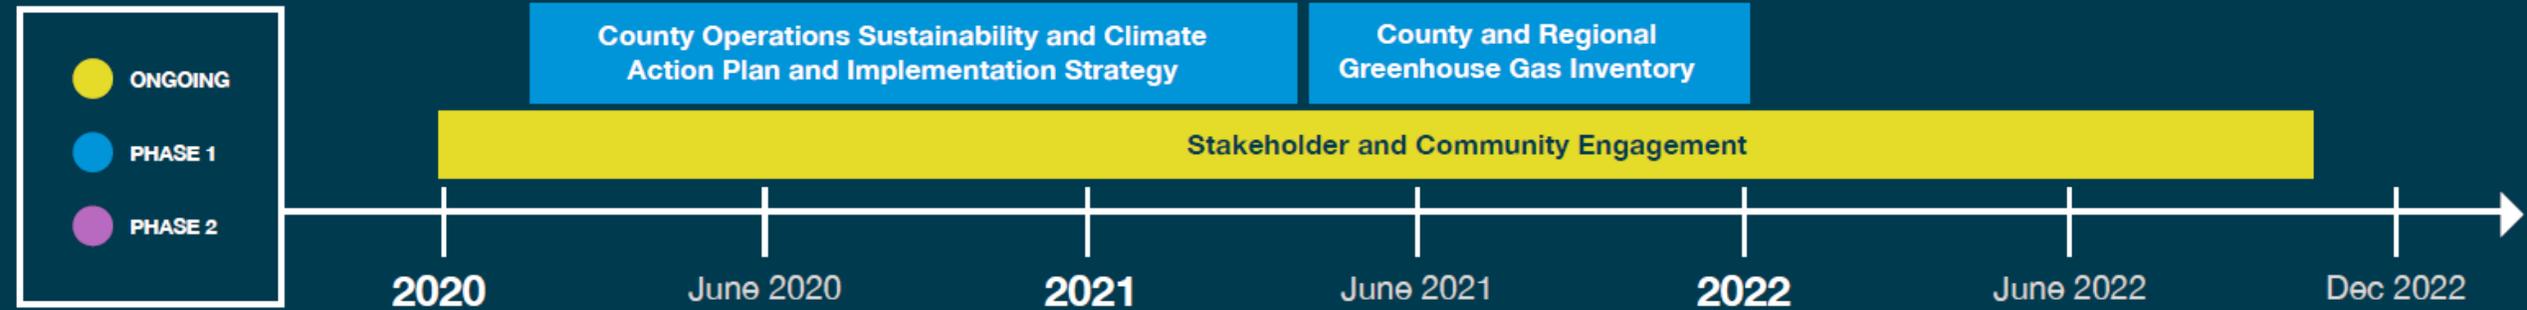

**Smart Buildings  
& Development**

Learn more about each of these areas at [allinclarkcounty.com](http://allinclarkcounty.com)

# All-In Timeline

## All-In Clark County Planning Process Timeline

# 2 WAYS CLARK COUNTY CAN ADDRESS CLIMATE CHANGE

**1** Reduce greenhouse gas emissions

**2** Prepare for impacts of climate change

# OUR VISION

A vertical white line is positioned to the right of the text 'OUR VISION', extending from the top of the text to the bottom of the text.

# Our Vision

**Developing a safe, connected, and accessible transportation system that prioritizes low-carbon mobility, public transportation, and active lifestyles.**

# 'Mobility' vs. 'Transportation'

## **Mobility** *noun*

The ability for people to get from one place to another using one or more modes of transportation to meet their daily needs.

- About the *people* not the system.
- Mobility = ***ability***
- Equitable mobility recognizes different people need different transportation options.

# What is 'Connected & Equitable Mobility'?

- **Well-connected** roads and routes for **transit, bicycling, and walking**
- **Emissions-free** transportation options, including **EVs**
- Access to healthy, **active transportation** facilities like bike paths, trails, and sidewalks
- Public transportation **investment**

# Examples from Other Communities

- Accelerate the shift to electric vehicles.
- Enhance and actively promote zero-carbon mobility options.
- Build a high-capacity transit system.
- Promote alternatives to single occupancy vehicle trips.

**PARTICIPATE IN  
THE PROCESS**

# Your Thoughts

# Stay Involved!
