

# It's Time We Go ALL-IN on Sustainability and Climate Action

*All-In Clark County* is a bold plan for a sustainable future. Climate change already impacts our region, threatening our health, infrastructure, and local economy. To protect our clean air and water, secure more affordable housing and clean energy, and create robust, diverse jobs, we are going *All-In* on aggressive goals for a livable climate. Together, with our five cities, our regional agencies, and local partners, Clark County is building a healthy, sustainable community for our current and future residents.

To create the *All-In Clark County Community Sustainability and Climate Action Plan*, the County sought feedback and expertise from as many community members as possible.

Through two community surveys offered in three languages; dozens of in-person and online events, meetings, and presentations; extensive digital outreach; and building meaningful community partnerships, Clark County engaged a wide and diverse audience over the course of 15 months.

Now, as we move into implementing the *All-In Community Plan*, the County will continue to engage community members to identify needs and opportunities to take action on climate change.

## ALL-IN Clark County Community Plan

The *All-In Community Plan* addresses the impacts of climate change in six key areas of everyday life:

### Clean & Reliable Energy

- Encouraging renewable energy production in Nevada
- Using energy efficiently and decreasing energy use
- Powering our community with clean energy

### Connected & Equitable Mobility

- Supporting reliable, low-emission transportation options
- Encouraging the transition to electric vehicles
- Ensuring biking, walking, and public transit are safe and accessible

### Diverse & Circular Economy

- Minimizing waste
- Using and reusing resources efficiently
- Creating good, green jobs

### Sustainable Water Systems

- Ensuring our water supply is sustainable and reliable
- Encouraging water conservation
- Sustaining our community with safe, clean water

### Resilient & Healthy Community

- Preparing for emergencies
- Keeping people safe and healthy
- Protecting homes and infrastructure

### Smart Buildings & Development

- Ensuring buildings are safe and high-quality
- Encouraging energy and water efficiency
- Making sure homes are healthy and utility bills stay affordable

### What does Resilience mean to Clark County?

A resilient Clark County supports residents, businesses, and visitors to be healthy, successful, and adaptable to changing climate conditions.

### What does Sustainability mean to Clark County?

A sustainable Clark County balances resource efficiency, social well-being, and environmental stewardship while equitably meeting the needs of a growing community and thriving economy.

# Collective Action for a Sustainable Clark County

In 2023, we released the *All-In Clark County Community Sustainability & Climate Action Plan*. Now, we are embarking on three *All-In* priority actions to begin implementing the plan.

Clark County will continue to be a national leader in:

- 1 reducing our greenhouse gases, the pollutants that are causing climate change, and
- 2 preparing residents and businesses for climate impacts.

## All-In Climate Education Program

The Education Program is a comprehensive, coordinated education and outreach program that enhances climate literacy as well as encourages community members to take action.

### GOALS

- ✓ Raise Awareness of All-In Clark County
- ✓ Grow Climate Literacy Among Community Members
- ✓ Be a Catalyst for Behavior Change in Support of High-Impact Strategies

## All-In Regional Climate Collaborative

The Regional Collaborative ensures a coordinated approach to climate planning and provides support for governments and agencies that are implementing the actions in the *All-In Community Plan* and other relevant regional plans. The Collaborative is made up of participants from Clark County's five cities and regional agencies.

### GOALS

- ✓ Foster Coordination and Capacity Building
- ✓ Take Action on Climate Solutions
- ✓ Share Funding and Resources

## All-In Home & Building Improvement Hub

The Hub is a proposed one-stop shop for home and building improvements that enhance indoor air quality and comfort, increase water and energy efficiency, and reduce utility bills. It would provide residents and businesses with the technical assistance, financial resources, and contractors needed to do the work.

### GOALS

- ✓ Provide Technical Assistance to Homeowners Seeking Improvements
- ✓ Identify Available Financial Resources
- ✓ Connect Homeowners with Skilled Contractors

Are you **ALL-IN?**

We need everyone to be *All-In* on climate action! Commit to installing solar panels, starting a backyard compost pile, making your next vehicle an EV, or simply having a conversation with someone about climate change.
